

MNF Enterprise Precision Analytics™ gives you a complete picture of your voice services, using the detailed data that only a carrier can provide.

Precision Analytics makes it easy to access intelligence about how your business is communicating.

Powerful reporting dashboards allow you to visualise, analyse and explore your communications data.

Executive oversight and cost control

Designed for senior managers and executives, Precision Analytics enables you to quickly understand the cost drivers and usage patterns that are unique to your business. Precision Analytics gives you deep carrier-level data, across your entire telecommunications solution.

Build a complete picture

Report on your whole organisation, or focus upon specific departments or user extensions. Analytic tools and reporting dashboards let you explore every aspect of your MNF Enterprise solution: fixed and recurring costs, inbound calls, outbound calls, excess usage, unused inventory and more.
